

Cratchit-WEB is an highly flexible, user-friendly, online service designed to organize the massive amount of information involved in the acquisition and on-going maintenance of licenses for a sales force of any size. Our clients range in size from a few dozen agents to over fifteen thousand!

Cratchit-WEB manages the information that is critical to your departments' smooth operation and your sales force's ability to sell your company's products.

Cratchit-WEB's intuitive user interface makes entering, editing, and reporting on your data so easy, our clients say they actually enjoy using it!

Designed for companies of all sizes, Cratchit-WEB enables you to record and track:

- Licenses and Appointments and their associated Lines
- CE requirements
- CE courses completed with credit tracking
- Address information with address history
- Employment information with employment history
- Education history
- Legal history
- Designations held
- Important upcoming activities or events (Reminders)
- Notification of due reminders (Deadlines)
- Permanent activity history (Diary)
- Personnel Information
- Documents in process
- NASD information for securities dealers

Cratchit-WEB also lets you track the agencies and other corporate entities within your company. You can track their corporate officers, aliases under which they do business, and at a glance, see a summary of their licensed and appointed agents. This is possible because you can link your agents to the agency where they are assigned, more than one if necessary.

Having all of that data neatly formatted means that you can produce a tremendous variety of reports. The ability to display the results of your reports on-screen means you can save paper, helping not only your department's bottom line, but the environment as well!

All Cratchit-WEB reports come with a range of filters that allow you to produce highly specified results. Among the many different reports Cratchit-WEB is capable of producing are:

- **Agent's License Renewals Due** - Find out who needs renewal and when to help you prepare. You can specify a date range or a number of days into the future. A corresponding report is available for your Organizations as well.

- **Agent's Appointment Renewals Due** - Same as above, but specific to the appointments held by your agents.

- **Agents Licensed By State** - Show all of the agents licensed by your company in a single state or a group of states.

- **Carrier Appointment Listing** - Find all agents or agencies that are appointed to a carrier (or all carriers) in a state (or group of states) instantly

- **Agent Record Summary** - an 'everything-you-ever-wanted-to-know' report for your agents. Use it to communicate with your agents to keep your information current.
